

Customize your Experience Games!

We've made them affordable, effective and highly profitable to be a part of your branding and customer experience.

We'll create the questions, send them to you for review, and you'll have a customized card game that your customers can play year after year.

Our most popular Card Game has four questions to a card. These questions are based on experiences a person could have at your specific park or monument. We'll create the questions and place them on each card in order of difficulty (from easy to hard). Players will then attempt to answer all the questions. If they can answer all four cards, they win that round and get to keep the card. The player that ends up at the end of the game with the most cards is the winner.

Experience Games is a division of Phoenix Publishing Group. PPG is based in Phoenix, AZ and has been producing custom children's activity books for various parks and monuments across the country.
